

Energy-related partnering opportunities

August 2026

Renewable energies

Technology offer TOHU20260803016

[A technology to effectively utilize and recycle sewage sludge](#)

Business Offer BOES20260805014

[Spanish biotechnology company offers a microbial inoculant for anaerobic digestion under commercial and supplier agreements](#)

Business request BRES20260805017

[Spanish biotechnology company seeks biogas plant operators and industrial partners for real-scale validation and international deployment](#)

Business Offer BOUA20260804016

[A Ukrainian startup that has developed a service for upgrading conventional PV panels to a hybrid that allows you to receive two energies \(heat and electricity\) from one PV panel is looking for partners and investors.](#)

Business Offer BOPL20260805001

[An integrated system of autonomous drones and AI software to automate the inspection of industrial wind farms, photovoltaic systems, operating independently of the GPS signal.](#)

Technology offer TODE20260819022

[Silicon-Germanium:Carbon \(SiGe:C\) quantum well solar cells silicon-based photovoltaics targeting conversion efficiencies beyond 30% for terrestrial and space applications](#)

Business Offer BOLV20260827002

[The Latvian company is seeking B2B cooperation with general contractors, renewable energy developers, investors and industrial clients.](#)

Research & Development Request RDRES20260826015

[Spanish SME seeks German industrial partner specialised in sustainable and recycled polymers for Eureka Lightweighting Call 2026 project on floating solar tracker technology](#)

Technology offer TOCH20260724020

[Patented high-temperature superconducting winding architecture for compact, lightweight wind generators](#)

Other topics (energy conservation, storage, distribution, etc.)

Business Offer BOPT20260803021

[Portuguese environmental consultancy offers assessment, licensing and monitoring services for energy, water and maritime-port projects](#)

Research & Development Request RDRSK20260817011

[Passive architectural strategies for climate-responsive and energy-efficient buildings](#)

Technology request TRIT20260831024

[Technological solutions for urban growth night-light analysis and solar footprint mapping sought | NEREUS Symposium 2026 Call for Solution Providers](#)

Business request BRTR20260806017

[Turkish Company Seeks to Become an Authorized Distributor and Service Partner for Industrial Battery Charger Manufacturers](#)

Research & Development Request RDRSK20260804003

[Slovak University & Science Park is looking for partner from Western Balkan or Moldova \(municipality, city or region\) interested in development of small-scale hydrogen valley by decarbonization](#)

Research & Development Request RDRHR20260813013

[Croatian fiberglass boatbuilder seeks technology partners for green propulsion integration \(hybrid/electric\) and manufacturing cooperation on 7-7.5m vessel models.](#)

Technology offer TOTR20260821003

[An SME with Advanced Thermal Energy and Heat Recovery Solutions Seeking Horizon Europe Consortia](#)

Technology offer TOFR20260818006

[Software startup for electricity distribution networks, seeking R&D partnerships with DSOs and research centres on grid modelling, flexibility, and smart grid management.](#)

Business request BRCZ20260817009

[Distribution partners sought for design-oriented EV and e-bike charging infrastructure](#)

Business request BRCZ20260817024

[Installation and maintenance partners sought for EV and e-bike charging infrastructure](#)

Business request BRCZ20260818024

[Property developers and facility managers sought for integration of sustainable EV and e-bike charging infrastructure](#)

Technology request TRCZ20260818027

[Research and development partners sought for next-generation charging and smart mobility solutions](#)

Technology offer TOPL20260818007

[The inventor of high-Efficiency Modular Floating Thermoelectric Generator \(TEG\) for Waste Heat Recovery and Solar Co-generation with Laser-Welded Disk Geometry is looking for business partners.](#)

Business Offer BOPT20260827006

[A Portuguese SME produces innovative and highly efficient electric generators with a stator winding on a printed circuit board and is seeking commercial cooperation with manufacturers and developers of power generation systems](#)

Technology request TRIT20260831029

[Technological solutions for urban monitoring regarding heat islands, canopy, green rings, wildland-urban interface and dark infrastructure sought | NEREUS Symposium 2026 Call for Solution Providers](#)

Business request BRR020260825009

[The company is seeking international suppliers and manufacturers of installation equipment and energy-efficient solutions.](#)

Technology offer TODK20260822001

[Power electronics, Power-to-X, grid-integration and digital-twin expertise for clean-energy systems.](#)
